True Part Fabrication

Custom and replacement parts, manufactured in Modesto, CA

Parts that keep the line running.

When a plastic part breaks and the replacement is backordered, discontinued, or sold only in a 500-pack, we model it and make it. No molds, no large minimums.

WHAT WE MAKE

Replacement parts
Discontinued, backordered or hard-to-find plastic parts, measured and reverse-engineered.

Jigs and fixtures
Drilling guides, holders and alignment aids built to your drawings or a sample.

Small-batch production
10 to 500 brackets, clips, covers or enclosures without paying for a mold.

Dust collection fittings
Adapters and fittings for shop vacs, extractors and collectors.

WHO WE WORK WITH

Food processing
Brackets, guides and line-side holders. Non-food-contact parts only.

Agriculture
Equipment clips, covers, spacers and mounts.

Warehouse and cold storage
Label holders, scanner mounts, cable guides.

Industrial shops
Jigs, fixtures and workflow aids.

HOW IT WORKS

1. **Send a photo or the part** plus the machine's model number.
2. **Get a written quote** with material, price and turnaround.
3. **We make it and test the fit** then ship it or you pick it up.

WHY US

- Free reprint if a part doesn't fit.
- On-site measuring in the Modesto–Stockton corridor.
- Your part's model stays on file, so reorders take one message.
- Typical business job: $75 to $800+, quoted in writing first.
